Subject: gas station on aquifer

Planning Board Members;

Prior to today's meeting I attended an in-person meeting and submitted written testimony. Unfortunately I am unable to attend tonight and because of my poor planning I am not able to access the zoom link. I did attend the public hearing earlier in the month, but was not able to submit testimony. I hold the Chair and Board members in high regard for the respectful interaction with the public while moving the most important pieces of education forward.

As a former member of the NH House Committee on Environment and Agriculture, I heard many complicated situations where carefully tailored legislation was required. Many of those situations were related to water safety and pollution control. It appears to me the prior work done to protect the water supply in Effingham was and is adequate and appropriate. It is unfortunate that this project seems to have reached a state of paralysis of analysis.

I appreciate and thank you for the amount of time and attention to detail in this decision. Allowing this project to move forward appears to me to be the case of putting the profit for a business about the safety of people and the care of the earth for years to come. I ask you to reject approval

Susan Wiley
